Course contents:
1. Quantum Mechanics
2. Laws and Theories of Kinetics

Course Responsibilities
Assignments 10 20%
Mid-Sem Exams 2 40%
Final Exam 1 40%

Assignments
These contain both questions and problems related to the course material. These are to be submitted as specified. Late assignments will not be accepted.

Mid-Sem and Final Examinations
The midsem examinations will carry 20% each and the final exam will have 40%. The remaining 20% will be for the weekly assignments. While mid-sems will include the material covered till the date of the examination, the final will cover the entire course material.

Any one wishing to take a make-up exam will have to produce a valid exemption note from a qualified Physician, explaining why the student can't take the examination on the scheduled date and time. Make-up examinations may not be given without such a note.
Exam dates will be announced 4 weeks in advance.

Grading
The final grade in the course will primarily depend on the overall performance in the course such as participation in class, problem sessions, the assignments, and performance in the written examinations.
